

# Calendars

Calendars are a way to show the days of the week and the months of the year.

Calendars help us see all the days in a month or year at one time. We use calendars to plan our time and see days before and after today.

# Months of the Year

Here is one way to remember how many days are in each month:

“30 days has September,  
April, June, and November;  
All the rest have 31  
Excepting February alone:  
Which has but 28, in fine,  
Till leap year gives it 29.”

Name two months that have 31 days:

Name \_\_\_\_\_

# Months of the Year

Here is another way to remember how many days are in each month:

Imagine the first knuckle as January, the first “valley” as February, and so on. Using this pattern, all of the months that “sit” on a knuckle have 31 days. February has 28 days (except in a leap year) and all of the months in the valleys have 30 days.

How many months have 30 days? \_\_\_\_\_
