

Name \_\_\_\_\_

# Small Boats

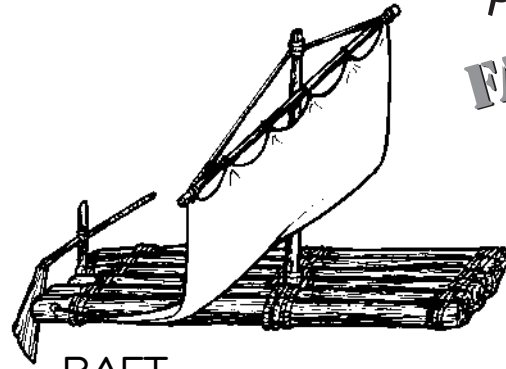

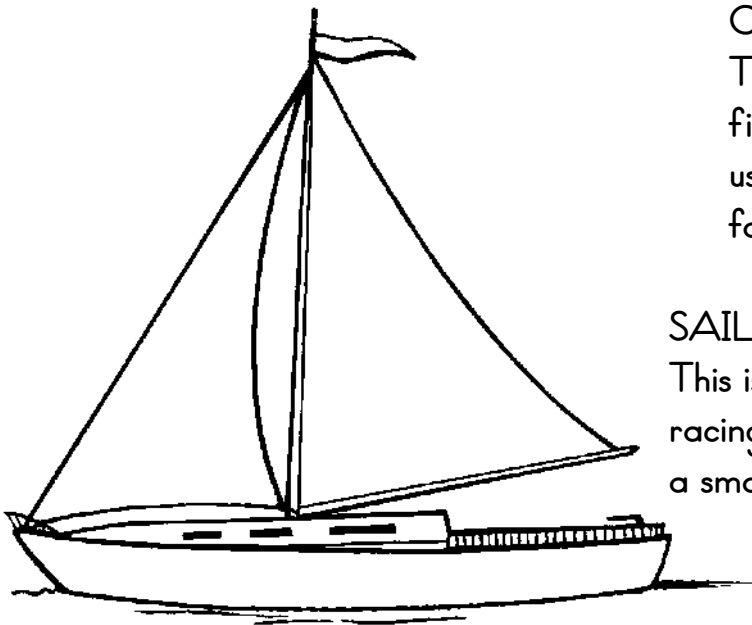

## CANOE

This is a birchbark canoe, made by stitching together pieces of birch bark over a wooden frame. This is a traditional kind of canoe used by Native Americans. Nowadays, canoes are made of metal or fiberglass. Canoes are propelled by hand using oars.

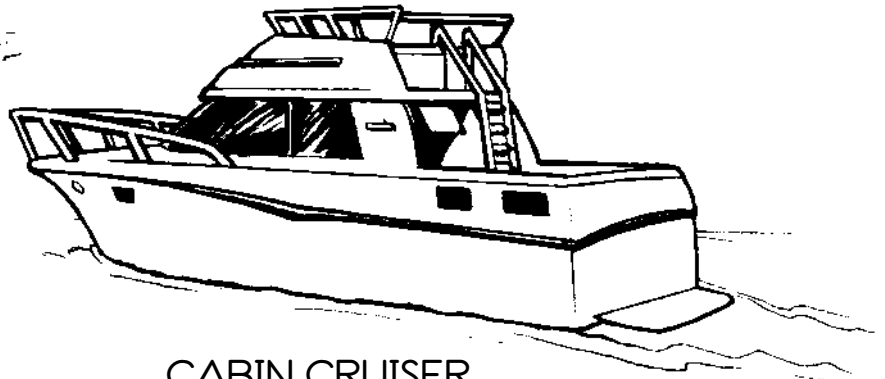

## ROWBOAT

Rowboats are made of wood or metal. They have oars that attach to the sides of the boat.

## RAFT

This is a raft made by lashing together wooden poles. This kind of raft was used in olden days. Modern rafts, like the ones used in whitewater rafting, are inflatable and are made of rubber. Rafts are propelled with oars, poles, or a sail.

## CABIN CRUISER

This is a mid-sized motorized boat used for fishing or recreation. Cabin cruisers are usually made of fiberglass. Yachts are large, fancy cabin cruisers.

## SAILBOAT

This is a boat used for recreation and for racing. It is powered by the sails but also has a small engine as a backup source of power.
